

Liftkar HD

The Liftkar HD is Sano's new generation of electric powered stairclimber capable of lifting up to 330 kg.

This is a rigid aluminium frame stairclimber, ideal for safes, boilers, air conditioning units and many other heavy or awkward loads.

It comes with a fixed aluminium toeplate, An advanced electronic braking system situated inside the rims of the main wheels.

Additional toeplates and an optional folding handle is now available.

- Puncture proof tyres
- Brakes can be switched off for turning on flat areas
- Two drive modes - single step and continuous mode
- Reduced machine weight
- Powerful lifting unit for easy lifting
