

Liftkar MTK

The Liftkar MTK is an ideal stairclimber for awkward and heavy loads, such as game machines, photocopiers, office furniture, vending machines and other heavy loads.

This steel framed stairclimber comes in two capacity options of 190kg or 310kg. The latter comes with an automatic braking system.

The MTK has an inbuilt toeplate or there are optional larger toeplate attachments available on our accessories list. The folding handle allows for easy support and control of a heavy load on the stairs.

- up to 310kg easily, safely and quickly
(8 – 18 steps per minute)

- over almost all kinds of stairs
(even winding stairs)

- able to move the load comfortably and smoothly (due to pneumatic tyres) on level ground.

The LIFTKAR MTK pays for itself quickly.

A braking option is available for the MTK 190.
